Body Cooling Apparel

You can use on the neck or forehead

Made in the USA Neck Coolers

The neck cooling devices we offer come in a variety of solid colors. Pick one of these hand-picked cooling products—all American-made and constructed of high-quality materials—for those scorching summer days.

Everything we sell stays at low temperatures even when nobody is using it. After being chilled with ice or a cooler, their cooling point drops to 38 degrees making them perfect for hydrating your skin all day long.

Rehab Cool Hoods

The cooling hood will improve their performance under pressure. A rehab cool hood is easy to put on and take off and lasts for multiple wears.

Prevent heat exhaustion and aid recovery after strenuous exercise with the Rehab Cool Hood.

The cooling rehab hood cooling product can be cooled in an ice cooler or refrigerator after 45 to 60 minutes of water activation. When worn, the therapeutic hood maintains 40 °F (5 °C) core temperature.

During qualifying and racing rounds in hot summer weather, your racing team and drivers will benefit from a rehab cooling hood.

LT Cooling Vest

- When not in use, hang to dry or store in A dry cleaning area or store in a cooler avoiding contact with water, since the product will continue to expand.
- You can also clean under running water with mild soap & store in your refrigerator.
- Never share to prevent the spread of germs and skin infections like MRSA
- After several uses the product will start to lose water and will need to be reactivated with room temp drinking water.
- When not using it will go back to its original state, to re-use repeat activation steps
