

SPEEDFLOW

Australian Made Performance Hose Fittings

PRODUCT PRESS RELEASE

Part Number: 612-00-BLK

Date: 24/09/2021

Description: BOSCH FUEL PUMP ADAPTER M12 X 1.5 FEMALE TO -8 O RING PORT

With the expansion of new Bosch fuel pumps utilising an M10 x 1.0 female thread for the outlet, Speedflow have created the 612-00 adapter which can be installed directly onto the standard Bosch supplied check valve and allow the use of AN fittings.

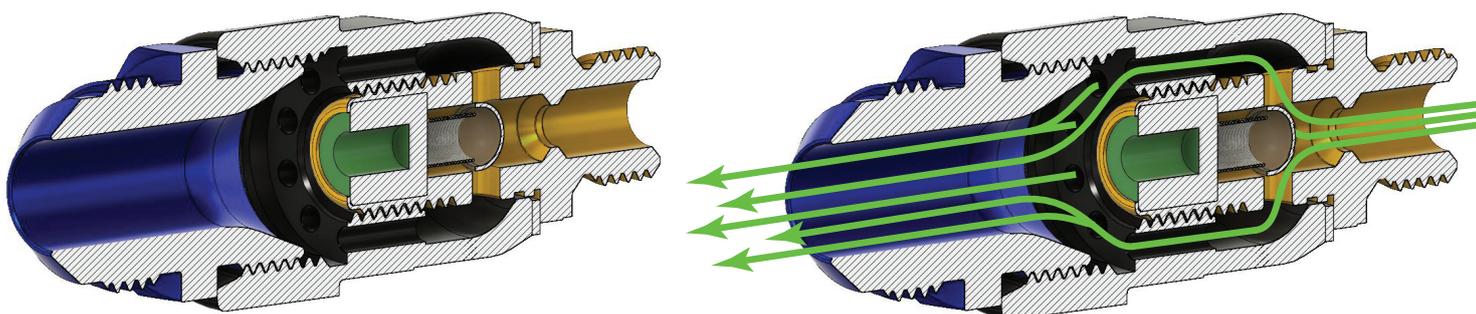

This adapter is manufactured from 6061-T6 aluminium and hard anodised black with a -8 Female O-Ring Port which provides a multitude of sizes ranging from -4 to -12 - all from the one style of fitting.

The flow is transitioned from the pump via numerous holes to allow for an uninterrupted flow from the pump to the outlet of the adapter.

Even if you are running an earlier Bosch Pump, you can still use the adapters to help you convert the standard Check Valve to a AN ready adapter with ease.
