## CBN Flywheel Grinding Wheels- Precision That Lasts

CBN Flywheel Grinding Wheels are engineered exclusively for cast iron flywheels, delivering unmatched precision and durability. Featuring a graphite aluminum core that requires minimal dressing and a robust 1/8" layer of CBN abrasive, these wheels offer exceptional longevity. Unlike conventional abrasives, CBN wheels maintain their shape, reduce heat buildup, and minimize downtime thanks to less frequent wheel changes. The result? Cleaner cuts, tighter tolerances, and a smoother finish—all while keeping your operation efficient and cost-effective. Ideal for high-volume automotive shops where consistency and performance matter most.
