RIGOROUS TESTING & PROVEN POWER

WE ARE FUELED BY ENTHUSIASTS

PROVEN PERFORMANCE | STYLE | SIMPLICITY

Versatility at the Heart of Airflow

Our filters are the heart and soul of our industry-leading cold air intake systems, and in 1999, we set out to provide the ultimate air filter for OE replacement, racing, off-road, and universal applications. Not only did we focus on creating the best filter on the market, but we also made it work for any application. From the track to the trail to the workhorse and back, aFe meets the high demands we place on our vehicles.

Cold Air Intake Systems

Industry-leading designs that are second to none. With innovative design processes and dyno-proven performance improvements on all of our systems, we're known for our cold air intakes — and for good reason: We make POWER!

Exhaust Products Handcrafted in the USA

It's a personal statement. With performance, sound, and style that demand a presence, our exhaust systems are a direct reflection of our commitment to delivering quality products. Rev it up!

Digital Power with Electronic Modules

Real POWER at your fingertips. Up your power and haul heavy loads with custom tunes, plug-and-play power modules, and digital gauge displays. Use our in-depth displays and data loggers to monitor your vehicle's health and keep it operating at optimal performance levels. aFe electronics put you in control.

Command the Way with Control and Suspension

Power without control is useless. It's about how the vehicle performs and feels behind the wheel. Our suspension products deliver excitement on-road, off-road, and on the track. Get more power to the ground and stick those corners with AFE CONTROL products.

Meticulously Made Engineered Products

Power and protection. From turbochargers to cooling systems, diff covers, and more, our engineers are experts in our trade. Our attention to detail far surpasses the industry standard. aFe POWER meets the demands of the high-performance driver.

TERRA GUARD Accessories

Get there and back again. When the trail demands more than just power, you need the right protection. The aFe POWER Adventure Team delivers a rugged, trail-rated suite of products designed to safeguard your vehicle through off-roading, overlanding... new adventures await!

New Product Innovation

At aFe, we consistently push the envelope to develop new products that are in demand. Like two of our newest additions: our high-flow throttle bodies and high-capacity fuel tanks. Whether it's faster, farther, louder, or more powerful, MORE of what you want is the hallmark of every aFe POWER part.
