THE ALDAN AMERICAN STORY

For over 30 years The Aldan Shock Absorber Co. built custom coil-overs for the baddest cars and most prestigious builders in the world. I met the U.S. veteran and owner of Aldan back in 2014. Touring the Aldan shop, I was amazed to learn that 100% of the Aldan product line was made in the U.S.A. Aircraft grade materials and components were used in every Aldan product. The attention to detail, the fit and finish and the quality of these custom coil-overs was something to appreciate.

Being a patriotic car guy – I saw potential in Aldan Shocks and struck a deal with the U.S. veteran-owner. My team and I have been working day & night to bring you the best products possible.

If you're looking to improve your suspension's handling & ride quality – We've got what you're looking for. Keeping on with tradition, we develop & manufacture suspension products made 100% here in the U.S.A. Quality, performance & value are our specialty. Hand assembled performance products built to last. Street & Track Tested since 1981.

Welcome to Aldan American.
