## ABOUT US -

Arrow Components was founded in 1995 by Larry DeForrest. With the devoted assistance of his sons Jason and Jonas, Arrow Components has developed and refined the products found within these pages. If you are an entry level racer, a professional racing team, or a manufacturer looking to showcase your products in the marketplace. Our goal is to provide you the best possible solution to your needs.

You could say from his early teenage days of racing go karts to his late teens and early twenties drag racing throughout the Midwest, Larry DeForrest developed a passion for motorsports. From that passion grew the desire to travel to and from racing events in a stylish, safe and comfortable manner. Larry's first manufacturing endeavor began in the 1971. With the ability to safely carry more than three people while towing a trailer, installing an automotive style interior into an empty cargo van offered a more practical solution. From this

idea, and a dedicated work ethic Gran Prix Van Conversions grew to become one of the nations leading Van Conversion manufacturing companies.

While traveling with the desire to keep a race car and support equipment safe and out of the elements an enclosed trailer provided the best solution. Although there were many in the marketplace, there were few that offered lightweight aluminum construction. In 1985 Larry founded Aerolite Trailers. With the

development of an all aluminum constructed enclosed trailer, Aerolite grew not only producing tag along trailers but, gooseneck and semi style trailers. Becoming one of the first companies to design and manufacture a vehicle lift inside the trailer, originating the term Stacker. Utilizing the experience with Gran Prix Larry applied the interior concepts of the van conversion business to Aerolite, developing an aluminum truck body with a stylish interior similar to a custom motorcoach. These bodies were set onto

medium and heavy duty trucks and tractors which today are commonly known as Motorcoachs and Toterhomes.

With the help of his sons Jason and Jonas, Larry DeForrest founded Arrow Components in 1995. Together they have worked to develop a wide range of garage and trailer accessories you will find in this product catalog. With constant innovation along with revisions to our existing product line, we have served customers from the entry level racer to Fortune 500 companies with our products in service worldwide.

# AWNINGS
