CAD/CAM Software

At Online Resources, Inc. our 3 decades in the CAD/CAM industry have made us a premier supplier, training site, and customer support center for your machining software needs. Our variety of SURFCAM products allows us to match needs and budget requirements to provide the perfect product for the job.

Surfcam is a proven CAD/CAM system, providing 2-5 axis systems for milling, turning, wire EDM, and waterjet. Surfcam allows easy entry at any machining level and gives a path of growth for future work. Give our support engineers a call to learn more about maximizing the capabilities of your CNC machines.

" We have enjoyed the relationship with Online Resources and the 3D scanning systems that take our engineering department to the front edge of technology."

- Tim White
NHRA Director of Engineering

SERVICES

Online Resources scanning services department brings quality and efficiency to all size projects. We own 8 different scanning systems, each with its own strength, ensuring that you get the maximum quality at the minimum cost.

3D Scanning Processing Software

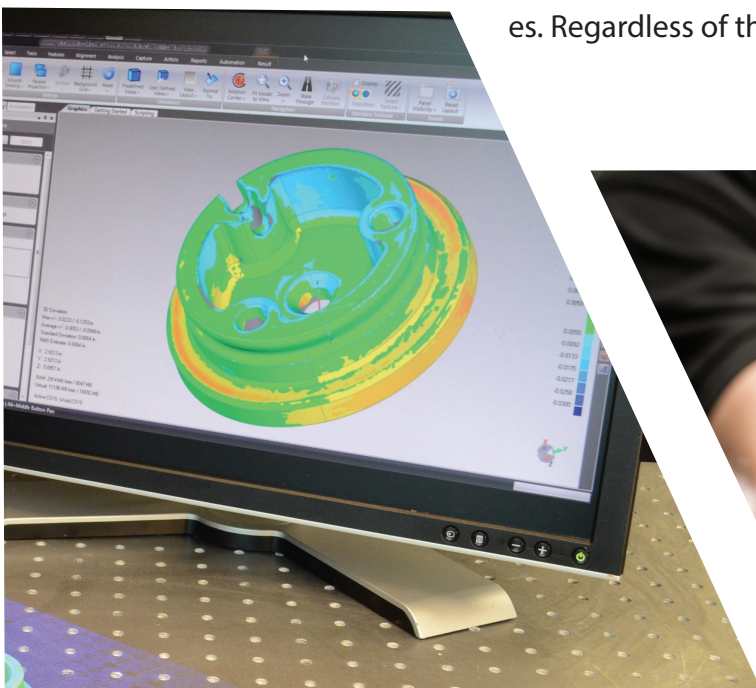

So you're interested in or maybe have already purchased a new 3D scanner, but are not sure how to successfully integrate it into your process? We can help!

Software systems are vital to a modern business. Online Resources helps you navigate through the investigation process to identify the perfect fit for your organization. If you are looking for reverse engineering, inspection, quality control, or design and development software we can help. From investigation to identification and training we make the process easy and enjoyable. Talk to one of our nationally certified trainers and support engineers to learn how your organization can get the maximum effectiveness out of your 3D Scanning equipment.

3D Scanning Systems and Hardware

Online Resources, Inc. is a vendor and partner for multiple scanner manufacturers. We are fluent in scanning technology and can help direct you to the system that will best meet your needs. Need high accuracy and resolution? No problem, we have systems accurate to .0005". Need large scale scanning? No problem, we have scanning systems capable of scanning large objects like airplanes, buildings, and bridges. Regardless of the need, we have a scanning system that will satisfy.

About Us

Online Resources, inc. was started by Jay and Tina Schaumberg in 1991. Originally a software company focused on serving manufacturers with programming challenges related to milling machines, Jay and Tina began a mission to help solve manufacturing challenges through the use of emerging technologies.

Over the past 27 years Online Resources has grown to be a leader in the CAD/CAM and 3D Scanning industries, with expert instruction in each of these technologies. Online Resources, inc. offers a wide range of products and services to help customers reach their goals of efficiency, productivity, and profitability.

Online Resources takes pride in their customer experience and ability to deliver industry leading results. The combination of an elevated customer experience and a constant search for efficient emerging technologies have given Online Resources continued success for nearly three decades.
