

VALVE TRAIN PARTS

Valve train parts like camshafts and push rods are great candidates for micro polishing.

TRANSAXLE GEARS

Transaxle gears are a great candidate for micro polishing. These gears were also cryogenically treated for increased strength.

TRANSMISSION PARTS

Transmission parts are ideal for Micro polishing. You will reduce driveline drag freeing up horsepower and get incredibly smoother shifting.

RING AND PINIONS

Ring and pinions are the parts we do the most of. Up to a 5% reduction in parasitic drag has been recorded. NEGP can do one set or a 100.
