## WHAT IS RACE GAS® ULTRA?

Race Gas® Ultra is specifically formulated for the rigorous demands of very high compression engines, especially forced induction and nitrous oxide injected applications. When blended with premium pump gasoline Race Gas® Ultra will equal the performance of high octane commercial racing fuel, up to 112 octane (R+M/2).

# IS RACE GAS® ULTRA SAFE FOR MY ENGINE?

Race Gas® Ultra has been laboratory tested and race proven to perform in any gasoline powered engine. Race Gas® Ultra has been proven safe for Oxygen Sensors and Catalytic Converters.

# HOW IS RACE GAS® ULTRA DIFFERENT?

Race Gas® Ultra is a race fuel concentrate. The purpose of the product is to create racing fuel out of pump gasoline from any gas station. So what does this mean?

First, other products on the market only raise the octane a few points but do not raise the octane to that of racing fuel. Race Gas® Ultra has been tested and proven to increase the octane of pump gas to 110 to 112 AKI, (R+M/2), when blended with gasoline as specified in our blend chart.

Second, other products on the market only increase the octane. Race Gas® Ultra also raises the chemical / BTU energy of base fuel to equal that of racing fuel. This is very important as low energy with high octane will lean out the engine significantly at Wide Open Throttle.

Lastly, Race Gas® Ultra blend results are shown in Anti Knock Index, (AKI) or R+M/2. This is the same measurement that race fuel manufacturers use to measure the octane of their fuel. Other products on the market blend to the Research Octane Number, (RON). The RON number is a poor representation of octane as it represents the performance of the fuel in the engine at idle. AKI represents the performance of the fuel under load.

# HOW CAN I BUY RACE GAS® ULTRA?

Race Gas® Ultra is available by the individual can or by the 6-can case.

**REAL RACING FUEL**

When blended to the proper ratio, **RACE GAS® ULTRA** transforms your ordinary pump gasoline into high octane, high energy, track grade racing fuel.

To ensure the power and performance demanded by racers, **RACE GAS® ULTRA** is formulated with a unique blend of three groups of compounds.

# TESTED PERFORMANCE

**RACE GAS® ULTRA** has been rigorously tested by independent laboratories, prominent engine builders and performance tuners. See [www.race-gas.com](http://www.race-gas.com)

# DESIGNED BY RACERS

**RACE GAS® ULTRA** was created by **MOTORSPORTS FUEL & EQUIPMENT** – a company made up of passionate gear heads and weekend racers just like you. We know the importance of high quality racing fuel.
