### Hybrid S- Female Fit

The Hybrid S female device is specifically designed to accommodate the female anatomy. The device will feature an additional 2 inches in the shoulder straps and the back straps are moved in 2 inches toward center. Refer to measuring instructions below. Please note that you are ordering a female device at the time of placing your order.

1. Measure around the chest below pectoral muscles with a cloth measuring tape.
2. Measure with driving suit. If not available, add 2 inches to measurement.
