TORQUE TOOLS

Maximum control in production guarantees high quality tools.

Use of the best quality steel, state-of-the-art machinery and environmentally friendly production processes. Our tooling experts ensure meticulous processing and future development. Precise adherence to strict testing and measuring specifications are the seal for the highest product quality. Wide range of mechanical or electronic torque spanners, testing devices and torque multipliers and accessories. Customised service packages including the development of customer-specific solutions.

All parts entering the production process - from the steel to the smallest spring - are inspected, and all production steps or operations are subject to strict quality controls.

After assembly and adjustment the torque tools are checked for accuracy (calibrated) in the final inspection and given a serial number. All torque tools are delivered with a factory test certificate or a calibration certificate in accordance with the applicable standards and guidelines. Processing quality, repeat accuracy and service life are tested in regular endurance tests. Insights gained here flow directly back into the optimisation of the production process.

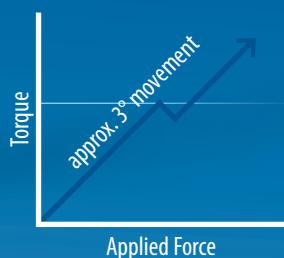

TRACEABLE SAFETY

- DAkkS calibration in our own accredited, independent DAkkS calibration laboratory
- In-house calibration according to

0.04 TO
54,000 N·M

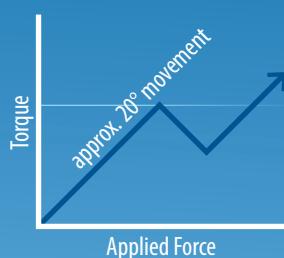

CLICK TOOLS - Overtightening Possible

When the preset torque value is reached the operator will hear a click, feel an impulse and there will be approximately 3° of tool movement. Resetting takes place when the hand pressure is released. Work can then immediately continue.

These tools are generally length dependent (exception DREMOMETER models AM - F), the position of the hand on the tool alters the torque produced.

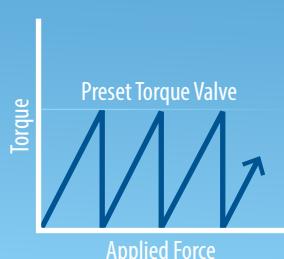

BREAKING TOOLS - Overtightening Unlikely

When the preset torque value is reached, these tools break at a specific point along the tool's length - usually at a pivot point near the tool's head. In most cases the movement is approximately 20°. The tool is automatically reset by allowing the handle to return to its in line position. These tools are length

dependent, the position of the hand on the tool alters the torque produced. Continued application of force after 20° of tool movement will increase the torque applied above the preset limit but with the greater angle of tool movement this is less likely.

SLIPPING TOOLS - Overtightening Impossible

When the preset torque value is reached, a mechanism in the tool causes the application of torque to cease and the tool slips free for a short time until resetting occurs. Even if the application of force

is repeated, the preset torque value will not be exceeded, therefore making it impossible to overtighten a fastener. These tools are not length dependent.

CERTIFIED PRECISION

We give you the security you need

NATIONAL STANDARD

Basis of all

lower-order standards

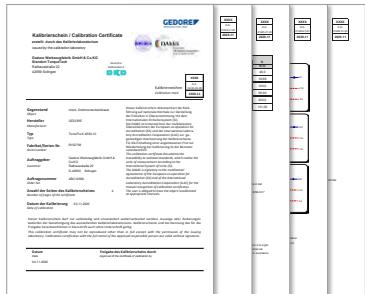

DAKKS CALIBRATION LABORATORY THE GEDORE TOOL FACTORY GMBH & CO.KG

ACCESSORIES STANDARD

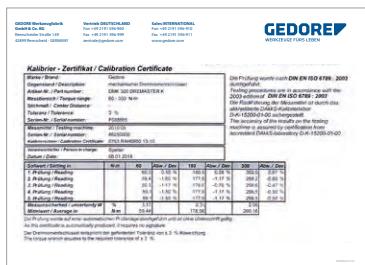

Highest standard

Accredited area according to

DIN EN ISO 17025:2018

- Direct traceability to the national standard
- DAkkS calibrations according to DAkkS guidelines: DKD-R 3-7:2018; DKD-R 3-8:2018 and DIN EN ISO 6789-2:2017
- Passing on the smallest possible measurement uncertainties
- DAkkS calibration of own and third-party products
(Repair and adjustment of third-party products is not possible).
- Air-conditioned laboratory control under strictest conditions
- DAkkS calibration certificate and DAkkS calibration mark

- Indirect traceability to the national standard
- Factory calibration according to DIN EN ISO 6789-2:2017 or GTTWN001
- Factory calibration, if necessary with adjustment and repair *(only for in-house production)*
- Factory test certificate and factory calibration mark from the Calibration laboratory of GEDORE Werkzeugfabrik GmbH & Co.KG

FACTORY CALIBRATION CERTIFICATE ACCORDING TO DIN EN ISO 6789-2:2017

- It contains all the information about the calibration object, required according to DIN EN ISO 6789-2:2017 (e.g. classification, measurement results, measurement uncertainty).
- The calibration is performed on suitable measuring equipment, which comply with the standard DIN EN ISO 6789-2:2017.
- The calibration result shall be reported together with a measurement uncertainty part according to DIN EN ISO 6789-2:2017.

DAkkS calibration certificate - internationally recognised

The DAkkS calibration certificate documents the calibration result - the DAkkS calibration mark on the calibration item identifies the DAkkS laboratory that carried out the calibration. It is recognised in many other countries as official proof of traceability - the basis for this are multilateral international agreements.

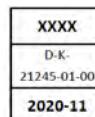

Please look for our registration no. D-K-21245-01-00. In the calibration procedure the calibration laboratory of GEDORE Werkzeugfabrik GmbH & Co. KG is obliged to fulfil the contractually stipulated criteria of the DAkkS.

In the DAkkS calibration certificate, in addition to the usual calibration certificate contents, the measurement uncertainties of the calibration equipment used are also taken into account. The documented calibration result includes both the measurement uncertainty of the calibration object as well as the measurement uncertainty of the calibration device. Therefore, the DAkkS calibration offers the highest level of security for the controlled screw tightening.

AUTHORISED CALIBRATION AND CONTROL AT THE HIGHEST LEVEL

- Own accredited DAkkS calibration laboratory for the measurand torque with registration number: D-K-21245-01-00,
Accredited procedures: DKD-R 3-7:2018; DKD-R 3-8:2018;
DIN EN ISO 6789-2:2017.
- A calibration laboratory belonging to the DKD since 2000, which has been accredited by the German Accreditation (DAkkS) accredited and monitored by the German Accreditation Body (DAkkS) according to DIN EN ISO 17025.
- Regular monitoring of the calibration laboratory by the DAkkS (every 24 months). Regular RE calibrations of the transfer standards by PTB (every 24 months)
- Regular internal audits and internal RE calibrations. (every 5 months)

A CALIBRATION IS ALWAYS A SNAPSHOT!

A calibration is always a snapshot! During calibration, measurement deviations and measurement uncertainties are recorded on a specific date and documented accordingly in a calibration certificate. On the basis of these calibration results, a statement can be made about the tolerance compliance during the last calibration. However, no statement can be made about future behaviour.

If you have any further questions - just dial our service number:

+49 (0) 1804 37 36 68

(only 0.24 Euro per call from a domestic landline;
deviations possible when using mobile phones or service providers).

The provision of a factory test certificate in accordance with GEDORE criteria, as well as adjustment and repair, is only possible for torque spanners and testing equipment from our own production. Factory and DAkkS calibrations are right-hand calibrations. Additional left-hand and angle calibrations on request.

Depending on requirements and customer wishes, we calibrate according to DAkkS guidelines or according to GEDORE criteria.

CALIBRATE REGULARLY, CALIBRATE AND CERTIFY. WHY IS THIS SO IMPORTANT?

This is the only way we can permanently guarantee the precision and reliability of our torque tools. This is a major concern for us, because your safety is close to our hearts. Because we hereby offer you the safety you need for everyday "controlled screw tightening".

WE RECOMMEND:

- Calibration 1x per year DIN EN ISO 6789-2:2017
or after 5000 load cycles DIN EN ISO 6789-1:2017

YOUR ADVANTAGE:

- Ensure functional capability
- Ensuring compliance with the tolerance specifications according to DIN EN ISO 6789-1:2017
- Prevention of faulty screw connections
- Ensuring product quality
- Reduction of follow-up costs

Full service package / benefits only valid for Germany.
Please ask our subsidiaries for the respective possibilities for your country.

8554 AM - 8559 AML
Torque wrench DREMOMETER
6-30 N·m / 50-270 lbf·in

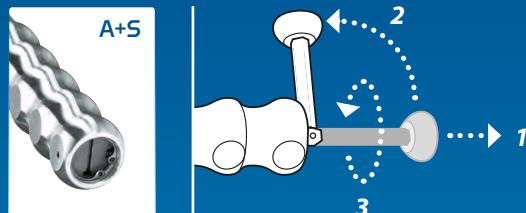

- Torque wrench with 1/4" square drive in the range 6 – 30 N·m
- Single- and double-square drive for controlled bi-directional tightening
- you can feel and hear an audible automatic click

- Double scale for measuring ranges in the lbf·in range
- Highest accuracy max. deviation of +/- 3%
- Error-free operation - no change in torque values when operated outside the handle.
- Not length dependent
- Certificate according to DIN EN ISO 6789:2017 part 2

TECHNICAL INFORMATION

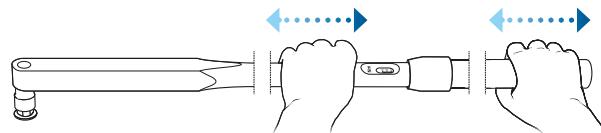

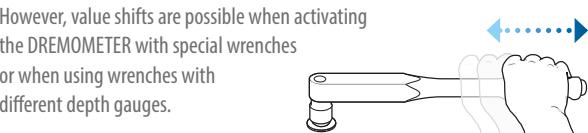

Setting of the torque value to N·m or alternatively to lbf·in / lbf·ft by the non-losable hexagon key in the handgrip. The smooth-running mechanism enables the setting to be made quickly without significant force needing to be applied. All DREMOMETERS are also available with locking and safety device (A+S). Pre-set value locking and safety device (A+S) eliminates the possibility of unintentional or manipulated adjustment, thereby representing more process reliability of the user.

OPERABLE WITHOUT INACCURACIES

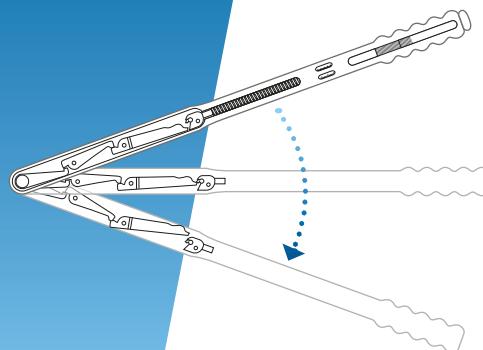

Regardless of where you apply the force, at the center of the handgrip or another part of the DREMOMETER, with both hands or using an extension tube, your torque setting will always be attained, without shifts in value. Due to its unique single-axis location of the centre of rotation and the output square drive, the DREMOMETER is a tool that can be operated free from errors. In contrast to conventional torque wrenches, this single lever enables tightening without shifts in the measured value and without interference caused by activation outside of the handgrip.

However, value shifts are possible when activating the DREMOMETER with special wrenches or when using wrenches with different depth gauges.

WORKING PRINCIPLE

The quality lever chain produced in the company's own drop forge reduces the strain on the mechanics to a minimum. The proportioning of the individual levers, which are optimally attuned to each other, gives the DREMOMETER its unique precision and its long tool life.

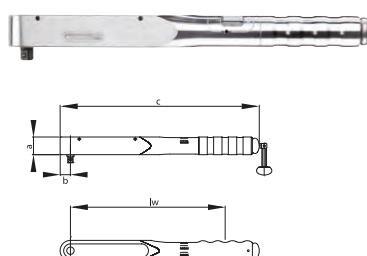

1 Position of the lever chain without impact of force (in starting position).

2 Position of the lever chain with impact of force before the set torque is achieved. The force is transferred from the primary lever to the intermediary and final lever until the final lever slips past the so-called release lever through the sliding back of the angle-lever body.

3 Position of the lever chain when the force impacts after the torque setting is achieved. Immediate position after the clear tactile impulse and audible signal "click". On relief, the lever chain moves back into the starting position (1).

8560 A - 8565 AL Torque wrench DREMOMETER 8-40 N·m / 70-350 lbf·in

- Torque wrench with 3/8" square drive in the range of 8 - 40 N·m
- Single- and double-square drive for controlled bi-directional tightening
- You can feel and hear an audible automatic click
- Double scale for measuring ranges in the lbf-in range

- Highest accuracy max. deviation of +/- 3%

750-2000 N·m

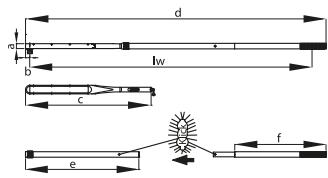

- › Torque wrenches with 1" square drive in the range 750 - 2000 Nm
- › Single- and double-square drive for controlled bi-directional tightening
- › you can feel and hear an audible automatic click
- › Double scale for measuring ranges in lbf·ft range

- › Highest accuracy max. deviation of +/- 3
- › Error-free operation - no change in torque values when operated outside the handle.
- Not length dependent
- › Certificate according to DIN EN ISO 6789:2017 part 2
- › Save effort using the optional extension tubes

i ACCESSORIES DREMOMETER

Ratchet heads DREMOMETER 754

Ratchet head no. 754 can only be used in combination with the DREMOMETER. Please note the right direction of rotation by the ratchet head when ordering. There are separate models for clockwise or counter-clockwise rotation. Ratchet head nos. 754-11 to 754-16 (counter-clockwise) can only be used with the DREMOMETER with double square drive.

754
Ratchet head DREMOMETER

- Enables controlled torque tightening in combination with a DREMOMETER torque wrench
- Fine-pitched, sturdy ratchet head
- Made of chrome-vanadium steel
- Clockwise models (no. 754-00 to -06)

- Anti-clockwise models (no. 754-11 to -16)
- Made of chrome-vanadium steel
- *Max. continuous load of ratchet according to DIN EN ISO 6789:2003 and/or maximum load of cavity

DREMOMETER Z

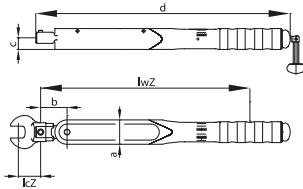

Technical Information Z

- The large cross-section of the spigot end transfers a maximum torque. "Quick-change system" with a locking pin mechanism guarantees that work takes place flexibly and rapidly.
- Ideal for bolted connections in cramped and hard-to-access locations. Depending on how the DREMOMETER Z is used, it is possible to work both in the forward direction and also to the side. For anti-clockwise tightening, simply turn the torque wrench through 180°

8460 Z - 8471 Z

Torque wrench DREMOMETER Z
with quick-fitting change
8-1000 N·m / 70 lbf·in - 730 lbf·ft

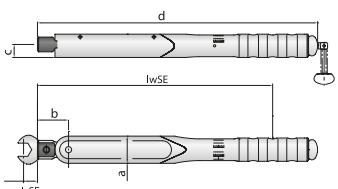

- > Spigot holder for push-on tools (jaw, ring, reversible ratchet)
- > you can feel and hear an audible automatic click
- > Highest accuracy max. deviation of +/- 3

- > Certificate according to DIN EN ISO 6789:2017 part 2
- > Actuation only at the handle centre
- > Observe the gauge block for special attachments

**DREMOMETER SE**

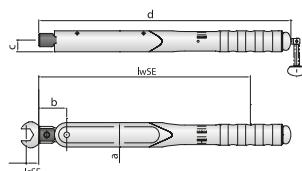

Technical information Quick-fitting change

Quick-change system with pin locking guarantees flexible and swift working methods. Ideal for installations in confined and poorly accessible spaces. Depending on the application for the DREMOMETER SE, access is possible from the front and side.

7480 SE - 7482 SE

Torque wrench DREMOMETER SE A+S
with pre-set value locking and
safety device (A+S)

- Fixed DREMETERS for series production
- SE receptacle for inserting tools (jaw, ring, reversible ratchet, ring ratchet...)
- you can feel and hear an audible automatic click
- Highest accuracy max. deviation of +/- 3

- Certificate according to DIN EN ISO 6789:2017 part 2
- Actuation only at the handle centre
- For special insertion tools, observe the gauge block
- If ordering, please specify the N·m value - if a fixed factory pre-setting is desired (price on request)

i DREMASTER DMK

Robust torque wrench with square drive and integrated ratchet-head function for controlled bi-directional tightening and interchangeable mushroom head with push-button release.

NONIUS

Model-dependent intervals of 1 or 0.5 N·m allow very accurate settings.

LIGHWEIGHT AND RELIABLE

Locking button enables reliable locking of the torque setting. "Torque adjustable" reference by means of opened lock symbol. Provision for rapid setting from the separate hexagon allen key fixture.

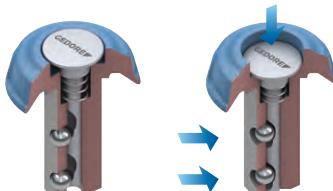

DUAL SCALE WITH MAIN AND ALTERNATIVE UNIT (N·M/IBF·FT)

Main unit N·m with vernier. At all times only one unit in the viewing area = avoids any reading errors. Change-over switch next to the scale for straightforward unit selection.

TECHNICAL INFORMATION ANTI-LOSS ATTACHMENT

In order to change the turning direction of the DREMASTER® DMK:

- 1 Press on the push-button with your thumb and take out the mushroom head
- 2 Turn the wrench
- 3 Re-insert the square drive

i DREMASTER DMUK

Torque wrench with square drive and integrated ratchet-function for controlled clockwise tightening

1

DRIVE

With 1/2" square drive and integrated lever-change reversible ratchet function for controlled clockwise tightening

2

ROBUST TUBULAR STEEL

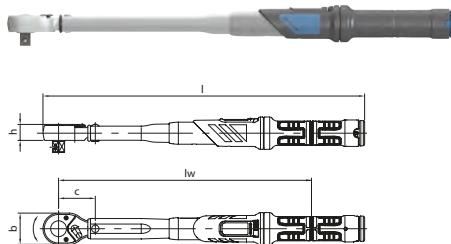

With high corrosion protection, satin powder-coated, with zinc-plated ratchet head

FEATURES

DMUK

Torque wrench DREMASTER® UK
20-300 N·m / 15-220 lbf·ft

- With 1/2" switch square and integrated ratchet function
- For controlled directional tightening
- you can feel and hear an audible automatic click
- Highest accuracy max. deviation of +/- 3%

- Ergonomically shaped plastic handgrip with calibration aid
- Switching between main scale N·m and sub scale lbf·ft, no reading errors
- Provision for rapid setting with hexagon allen key, not included
- Secured adjusting/setting system
- Certificate according to DIN EN ISO 6789:2017 part 2

DMZ

Torque wrench DREMASTER® Z
20-850 N·m / 15-630 lbf·ft

- Spigot holder for push-on tools (jaw, ring, reversible ratchet)
- For controlled bi-directional tightening
- you can feel and hear an audible automatic click
- Highest accuracy max. deviation of +/- 3%
- Ergonomically shaped plastic handgrip with calibration aid

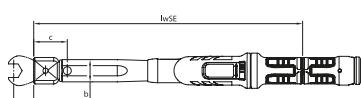

- Switching between main scale N·m and sub scale lbf·ft, no reading errors
- Provision for rapid setting with hexagon allen key, not included
- Secured adjusting/setting system
- Certificate according to DIN EN ISO 6789:2017 part 2
- For special tools observe the gauge block

i TORCOFIX K

Robust torque wrench with square drive and integrated ratchet-head function for controlled bi-directional tightening.

MICROMETRE SCALE

Optimised shape, stable scale frame with red shaded micrometre scale ring. Model-dependent intervals of 0.025, 0.1, 0.25, 0.5 or 1 N·m allow very accurate settings.

Improved shape, stable scale frame with red underlaid micrometer scale ring. Model-dependent graduations of 0.025, 0.1, 0.25, 0.5 or 1 N·m allow a very precise setting.

LIGHTEST AND RELIABLE

Locking button enables reliable locking of the torque setting

CHROME-PLATED RATCHET HEAD

1

All 1 1/4" - 1/2" square drives of the TORCOFIX K-series with mushroom head. This mushroom head prevents an unintentional pulling out of the whole square drive when changing the nut socket.

2

AUTOMATIC ACTUATION

The TORCOFIX actuates with a clear tactile impulse and audible signal and is immediately ready for operation again.

3

DIN EN ISO

Classified to DIN EN ISO 6789-2:2017 Type II Class A, with a factory certificate allowing for operations to be traced back. Calibrated to a permitted +/- 3 % deviation and better. The specifications of the standard (+/- 4 %) are exceeded.

4

ROBUST STEEL TUBE

With high corrosion protection, chrome-plated, silk-metal.

5

SERIAL NUMBER

Serial number on the wrench and on the certificate for unambiguous product identification, traceable via in-house DAkkS laboratory to national standards

6

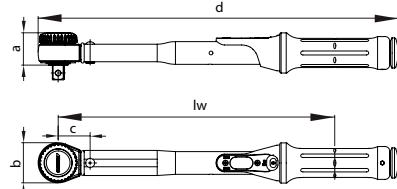

HANDGRIP WITH A USER AID

NEW

TF-K

Torque wrench Torcofix TF-K
20-850 N·m / 15-630 lbf-ft

Use:

- Controlled screw tightening in the most common range of 20 - 850 N·m / 15 - 630 lbf-ft
- Adjustable, releasing and sturdy tubular torque wrench with integrated ratchet and with square drive for industry and the trades

Features:

- Classified as per DIN EN ISO 6789-2:2017 Type II Class A; adjusted to a maximum permissible +/-3% deviation and thus with a greater precision than the standard-stipulated +/-4%
- Incl. traceable test certificate (DIN EN ISO 6789-2:2017)
- For controlled right and left tightening (Reverse square for change of direction)
- 1/2" mushroom head square with ball lock. From 3/4" with square socket and pin retention
- Robust, matt powder-coated tubular steel construction, with galvanized ratchet and high-quality plastic parts
- New ergonomic handle, shaped according to the natural grip position of the hand

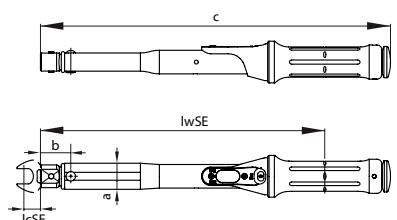

- Clearly recognisable and tactile hand centring aid and calibration aid in the middle of the handle
- Double scale N·m / lbf-ft and vernier are protected from abrasion and contamination by an enlarged viewing window
- With vernier scale for N·m main scale for setting intermediate scale values; lbf-ft setting only via main scale
- Vertical alignment of the scale, torque adjustment therefore suitable for left and right handers
- Scale line positioned directly above the scale prevents reading errors (parallax errors)
- Unit labeling integrated in the scale frame and also protected by viewing windows
- Precise jump-off mechanism generates a clearly perceptible and audible trigger signal when the set torque value is reached
- Incl. roll away protection, prevents rolling away when the tool is put down

i TORCOFIX Z

Technical Information Z

- The large cross-section of the spigot end transfers a maximum torque. "Quick-change system" with a locking pin mechanism guarantees that work takes place flexibly and rapidly.
- Ideal for bolted connections in cramped and hard-to-access locations. Depending on how the TORCOFIX Z is used, it is possible to work both in the forward direction and also to the side. For anti-clockwise tightening, simply turn the torque wrench through 180°

4400 - 4485
Torque wrench TORCOFIX Z
5-850 N·m / 3,7-630 lbf·ft

4150 - 4151

Torque wrench for pre-setting TORCOFIX FS
5-200 N·m

- SE holder for insert tools (jaw, ring, reversible ratchet)
- For controlled bi-directional tightening
- you can feel and hear an audible automatic click
- Highest accuracy max. deviation of +/- 3%

- Ergonomic system for torque adjustment
- Certificate according to DIN EN ISO 6789:2017 part 2
- For special tools observe the gauge block
- If ordering, please specify the N·m value - if a fixed factory pre-setting is desired (price on request)

Code	No.	□ mm	N·m	lWFs	lcFS	a	c	kg

PRIME FH

Torque screwdriver type PGNS FS
0,2-4,5 N·m / pre-set

- Basic model
- Adjustable torque screwdriver for series assembly
- 1/4" hexagon socket for 1/4" bits - C 6.3
- For error proof controlled directional tightening, anti-clockwise operation for loosening
- It is not possible to over-tighten the screw

- deviation of +/- 10 % without certificate
- Fixed setting by hand on a test device
- If ordering, please specify the N·m value - if a fixed factory pre-setting is desired (price on request)
- Fatigue-free working through ergonomic handle

PRO ESD FH

Torque screwdriver Type PGNE FS
0,05-13,5 N·m / pre-set

- Adjustable torque screwdriver for series assembly
- 1/4" hexagon socket for 1/4" bits - C 6.3
- With slip clutch for error proof controlled right and left hand tightening
- It is not possible to over-tighten the screw
- Test certificate according to DIN EN ISO 6789, permissible deviation of +/- 6%

- Fixed setting at GEDORE or by hand on a test device
- If ordering, please specify the N·m value - if a fixed factory pre-setting is desired (price on request)
- Fatigue-free working through ergonomic handle
- Models 4.5 and 13.5 with additional removable T-bar for ease of use

i TORQUE SCREWDRIVERS 756

**1**
**DRIVE ADAPTOR
1/4"-SQUARE DRIVE**

To fit industry standard nut sockets.

2
**DRIVE ADAPTOR
1/4"-HEXAGON-MALE**

Guarantees a safe and stable connection to the tool.

3
"POSITIV-LOCK"-SYSTEM

Locks the set torque, reliably preventing it from wrong setting.

4
SCALE

Clearly readable scale ring; enables you to make the setting accurately, quickly and without error.

5
SLIDING T-BAR

Made of quality steel, can be adapted to enhance users transmission of power.

6
1/4"-DRIVE TYPE

Made of stainless steel, for industry-standard bits.

7
RUBBER HANDGRIP

Ergonomic, can be held securely in your hand.

i TSN SLIPPER

Pre-set ratchet head torque wrench with automatic actuation and slip function. Over-tightening is not possible.

1

INTEGRATED RATCHET FUNCTION

Particularly dependable ratchet having 36 teeth (759-00-01) or 48 teeth (759-02-03). Slip-through function guarantees controlled and safe screw tightening, even in hard-to-access locations.

2

OUTPUT SQUARE DRIVE

Made of quality steel with ball-locking mechanism

3

HIGH REPEATABILITY

Guarantees constant tightening torques.

4

ROBUST CASTING PART

Made of corrosion-resistant, rustproof material.

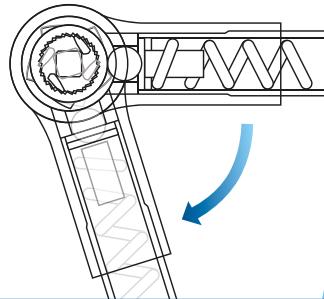

5

RUBBER HANDGRIP

Ergonomic and pleasant to hold in your hand. Prevents slipping.

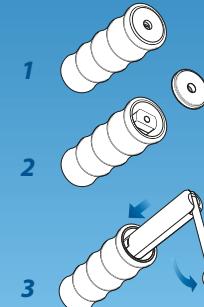

WORKING PRINCIPLE

When the pre-set torque value is achieved, the mechanism slips through over the ball (without the possibility of over-tightening). The torque wrench is then immediately ready for the next operation.

TECHNICAL INFORMATION

All TSN SLIPPER and TBN BREAKER torque wrenches (apart from 760-00-01) are fitted with the patented "Mechanical Torque Adjustment Locking Device" to modify torque tester.

TSN
Torque wrench TSP SLIPPER
1-10 N·m / pre-set

i TBN BREAKER

Pre-set torque wrench with automatic snap actuation. Torque wrench offering maximum accuracy. Guaranteed tightening values without over-tightening.

⑯ 5 - 135 N·m

⑯ 0,2 - 135 N·m

1

DRIVE

16 mm spigot end or 9x12 mm rectangular cavity made of quality steel with pin-locking mechanism

2

BREAKING

All TBN breaking torque wrenches break by 20° at the pivot point when the set torque is achieved. The models 760-00-01 can also be set to a breaking angle of 90°.

3

RUBBER HANDGRIP

Ergonomic and pleasant to hold in your hand. Prevents slipping.

4

PATENTED MECHANISM

Guarantees a long product lifespan with guaranteed accuracy values

5

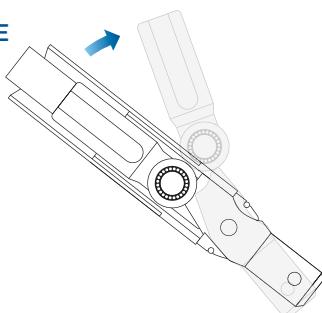

LIGHTWEIGHT STEEL TUBE

Firm, solid, and free of corrosion

As an option, we also manufacture the TBN BREAKER models 760-00-01 with interchangeable fittings directly positioned on the tool.

WORKING PRINCIPLE

When the TBN breaking torque wrench is operated, the rear section of the driver unit presses the roller. When the pre-set torque value is achieved, the lever switches over and the front section of the drive unit breaks.

TECHNICAL INFORMATION

TBN BREAKER 760-00-01 values are changed using the "Double Positive" adjustment system.

TBN

TBN Breaking Torque wrench KNICKER
0,4-135 N·m / 1,8-1195 lbf·in / pre-set

- fixed torque wrench for series assembly
- 9x12 mm inner rectangular or 16 mm spigot
- For bi-directional tightening (the wrench only has to be turned by 180°)
- Breaking of the handgrip by 20° when the pre-set torque value is achieved makes over-tightening unlikely
- Certificate according to DIN EN ISO 6789
- Fixed setting at GEDORE or by hand on a test device

- If ordering, please specify the N·m value - if a fixed factory pre-setting is desired (price on request)
- No. 760-00-01: EPA (Electrostatic Protected Area) compliant

8801

Torque wrench TYP 88 KNICKER
0,4-135 N·m / 1,8-1195 lbf·in / pre-set

**Use:**

- Controlled screw tightening in the most common range of 150 - 1000 N·m
- Industry and vehicle sector (lorries, industrial vehicles)

Features:

- Adjustable torque wrench - with scale
- 3/4" square drive with integrated ratchet function
- Suitable for bi-directional tightening on account of push-through square drive
- Working accuracy: +/- 4 % tolerance of set torque

- Acc. to DIN EN ISO 6789, traceable to national standards
- Breaking mechanism as an actuation signal which can be seen and felt and makes over-tightening unlikely
- Dual scale N·m and lbf·ft

Scope of delivery:

- Torque wrench Typ 88 KNICKER
- Test certificate acc. to DIN EN ISO 6789
- Delivery in sturdy plastic case

WWW.GEDORE.COM

i TYP 83

Torque wrenches with slave pointer Ideal for test, control and maintenance work

1

CLEAR PRODUCT IDENTIFICATION

Provided by the type plate/label. The article number and the serial number always ensure traceability in the scope of your test- and checking-tool management.

2

SOLID TUBE

Light-metal tube with plastic sleeving.

3

PRACTICAL HANDGRIP

Handgrip shaped in accordance with the most recent ergonomic findings. Resistant to grease and oil.

4

INTEGRATED RATCHET SPINDLE

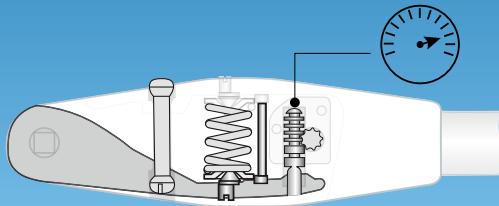

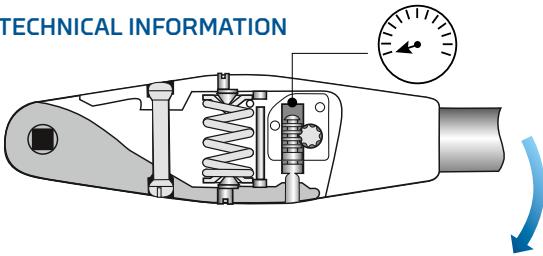

With double square drive enables highspeed bi-directional tightening.

5

DUAL SCALE

N·m and lbf·in/lbf·ft with main and slave pointers, protected by a strong window made of Trogamid "T".

TECHNICAL INFORMATION

The working principle of the torque wrench with slave pointer type 83

ADS - EDS

Torque wrench with slave pointer Type 83
0,8-2000 N·m / 7 lbf·in-1500 lbf·ft

- Dial-indicating torque wrench with dual scale and slave pointer
- Controlled tightening (right/left) and checking of tightening values
- 1/4", 3/8", 1/2", 3/4" or 1" double square drive
- Models No. 8301-04 to No. 8304-80: with integrated ratchet-function

- Certificate according to DIN EN ISO 6789 / - 4 % tolerance
- 5 % overload of the maximum value
- Light, robust aluminium construction
- Models No. 8301-04 to No. 8301-40: EPA (Electrostatic Protected Area) compliant
- Audio-visual signal is standard on models 8303-40 to 8305-20

i E-TORQ Q

Electronic torque wrench

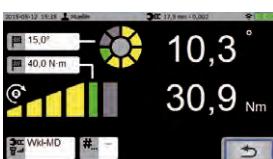

CHARGING UNIT

Charging unit for two lithium-ion rechargeable batteries (optional)

INTUITIVE. VISIBLE.

Touch function or six hardware keys for intuitive user software operating and, in addition, an extremely robust enter key.

Virtual progress bar for torque and angle

Clear depiction of the measurement results

Measured value compilation and assessment

Graph representation and evaluation directly possible at E-torq Q

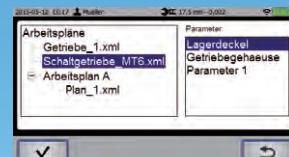

Touch screen for clear objective input

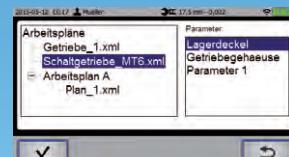

A variety of users and a user account management can be set up

Management of fitting and depth gauge parameters

Wireless (Wi-Fi 2.4 and 5 GHz) or USB mini interface for communication purposes

Wireless (Wi-Fi 2.4 and 5 GHz) or USB mini interface for communication purposes

2D scanner (optional) for reading in barcodes and QR codes

ET2SA

Electronic torque wrench E-torc
2-1000 N·m / 1.5-750 lbf·ft,
with rotary angle measurement

- Documented tightening for torque and angle of rotation
- Optical, acoustic and sensory signalling
- Graphic evaluation with free software
- Marked contrast graphics display with backdrop lighting
- 1/4" square, 9x12, 14x18 rectangular, 22 and 28 mm spigot mount (depending on model)
- Screw joint analyses
- Process control
- Factory certificate according to DIN ISO 6789
- Optional certificate according to DAkkS-DKD-R 3-7

- Torque reading precision +/- 1 %, +/- 1 digit from reading figure
- Demonstration and consultation - technical field service
- Further options on request: further torque, yield strength etc.

TT3KH

Electronic torque wrench TorcoTronic III
10-350 N·m / 7,4-258,2 lbf·ft

- Microprocessor-controlled, electronic torque wrench
- Torque and torque angle measure
- Documented right and left suit
- Software included
- 5 parameters storable
- 2000 storage places
- Measurement accuracy torque +/- 1 %, +/- 1 digit
- Measurement accuracy torque angle +/- 1 %, but min. +/- 1° on 360° with min. 4°/sec
- Different depth gauges for end fittings programmable

- Simple operation, user-friendly icon menu navigation
- Clearly readable, illuminated LCD display
- Factory certificate according to DIN ISO 6789
- Optional certificate according to DAkkS-DKD-R 3-7

CAPTURE Hub

Electronic testing device Capture Hub
0,1 - 25 N·m

1%

- › Digital torque tester for testing torque wrenches and torque screwdrivers
- › Light and robust thanks to the aluminum basic housing, horizontal and vertical mounting possible
- › 4 models in the range of 0.1-25 Nm
- › With 1/4 "square socket (CH25 with 3/8")
- › Measuring tolerance +/- 1 % for all readings
- › 4 measurement modes: sliding value display (track), breakpoint detection (first peak), peak value measurement (peak), screwdriver test
- › Including screw joint simulator attachment for testing screwdrivers
- › Switchable units N m, cN m, lbf ft, lbf in, ozf in
- › 50 test sequences can be programmed
- › 2000 measured values can be saved
- › Clear and high-contrast TFT display
- › expandable by an additional capture sensor (connection socket available)

- › powerful lithium-ion battery for Line Side mains-independent work
- › Data output and mains operation via USB connection
- › optional: PC evaluation software "Capture Manager" (2908778)

Scope of delivery:

- › Capture Hub
- › Screw joint simulator
- › USB cable
- › Power supply unit with Euro plug
- › Operating instructions
- › Test certificate
- › stable plastic case with inlay

NEW

CLElectronic test device Capture Lite

0,02-350 N·m / 0,015 lbf·ft - 260 lbf·ft

1%

- › Digital torque tester for testing torque spanners and torque screwdrivers
- › Light and robust due to aluminium basic housing
- › 5 models in the range from 0.02 N·m to 350 N·m
- › With 1/4", 3/8", 1/2" square mount (CL1 and CL10H with 1/4" hexagonal shaft)
- › Ease of use. Intuitive software design is similar to CAPTURE Display allowing existing Capture users to be familiar with the architecture and new users to become productive quickly, with its easy to use menus and Plug & Play functionality
- › 3 measuring modes: floating value display (track), kink point detection (first peak), peak value measurement (peak)
- › easy handling due to 1-button operation (measuring mode, unit)
- › Switchable between N·m, lbf·ft and lbf·in (depending on model)

- › optimal readability due to single-line well illuminated OLED display
- › Autostart function when a torque tool is inserted
- › Auto-sleep mode when not in use
- › Easy mounting on the table or on the wall
- › Power supply and data output via USB connection

Scope of delivery:

- › Capture Lite tester
- › USB connection cable
- › Adapter (depending on model)
- › Operating instructions
- › Test certificate
- › stable plastic case with inlay

8612
Electronic torque tester DREMOTEST E
0,2-3150 N·m / 1,8 lbf·in - 2323 lbf·ft

- › Checking/adjustment of right-hand torque wrenches and screwdrivers
- › Plug & Work = very easy to use
- › High measurement accuracy: +/- 1% tolerance of reading, +/- 1 digit
- › Autoreset
- › Can be switched from N·m to lbf·ft and lbf·in

- › Serial interface RS232 for PC
- › Test certificate
- › Optional: Car adapter for 12 Volt power supply (No. 8612-390),
- › Optional: plausibility verification software (Code 2834391)

E-TP
Electronic torsion test device

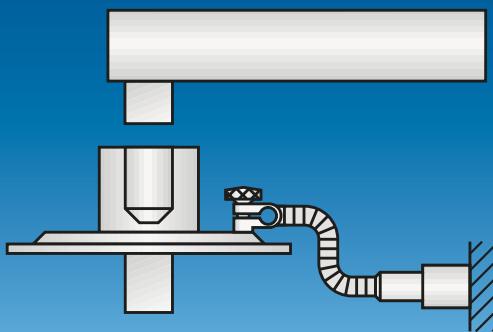

- › Electronic torque tester integrated with measurement electronics
- › Testing, adjusting and certifying right-hand and left-hand torque wrenches
- › Vertical and horizontal testing according to DIN EN ISO 6789
- › Factory certificate based on VDI 2646
- › Optional certificate as per DAkkS-DKD-R 3-8

- › A large LC graphic display
- › Wide measuring range in N·m, can be switched to cN·m, lbf·ft or lbf·in (model dependant)
- › Advice from our technical field service
- › Includes display, cables and software
- › Adapter cable RS232 to USB optionally available (Code 1957880)

i TORQUE ANGLE INDICATOR 8200

- When using torque angle indicator no. 8200, please note:
The maximum output of the torque wrenches must not be passed.
Please ensure that the maximum load capacity of the square drive including the values achieved by angle-regulated tightening is not exceeded:
- 1/2" max. approx. 390 N·m
- 3/4" max. approx. 1330 N·m

8200
Torque angle indicator

- › Torque-angle tightening
- › Separate angle of rotation gauges with 1/2" or 3/4" square drive
- › For additional precise angle tightening (0-360°)
- › No. 8200-01/-02 with sliding claw and magnetic arm
- › No. 8200-11 only with magnetic arm

- › To operate with a suitable torque wrench
- › The maximum load of the torque wrench must not be exceeded

DISCLAIMER

This catalogue replaces all previous editions.

The photographs and technical details are of the articles offered at present.

Since we are constantly updating and improving our products to keep them at the present state of the art, we reserve the right to make modifications and changes with regard to appearance, dimensions (always in "mm", if not otherwise stated), weights and properties, as well as in performance. No claim for correction or replacement supplies may thus be made with regard to products already delivered. Cancellations may be made at any time without there being any grounds for legal claim.

All information on use or safety is non-binding; nor does it replace any legal regulations or those made by professional or trade associations.

We do not accept any liability for printing errors. No supplemental items (tools etc.) are included in the scope of supply.

Reprinting, even of excerpts, requires the previous permission in writing by GEDORE.
All rights reserved worldwide.

We refer to our current general agreements and commercial conditions as well as our delivery and payment conditions in the imprint under www.gedore.com.
