ZyCoat®, LLC launches Coating Services to apply ZyBar high temperature heat dissipation coatings to your engine components

OLATHE, KANSAS (May 1, 2019) – ZyCoat, LLC announces the launch of coating services to apply ZyBar high temperature, thermal dissipation coatings to your engine components such as exhausts, manifolds, headers, turbos, intakes and inter-coolers. ZyCoat master technicians will receive, inspect, prep, coat inside & outside with ZyBar, cure and inspect your parts.

ZyCoat, LLC Coating services is available on-line <https://www.zycoat.com/coating-services/>. ZyCoat (& HushMat) owner, Tim McCarthy, will be showing the full line of ZyCoat products and services at Back to the 50's in Minneapolis/St. Paul June 21 through June 23 and at the National Street Rod Association Nationals in Louisville, Kentucky August 1-August 2. ZyCoat Coating Services provides the high temperature and high performance, durable and corrosion resistant coatings to keep your hot engine parts performing and looking great.

HushMat, the fastest-growing automotive thermal insulation and sound-deadening materials company, continues to lead the industry with product technology like ZyBar and ZyCor from ZyCoat that is simple to install and high-performing.

“HushMat has entered the incredibly high temperature and aggressive engine-side thermal materials category with ZyBar Manifold and Exhaust Coating for thermal treatment in all engine components and we now offer Coating Services to that enthusiast that may not have the time or tools to get the job done,” said ZyCoat and HushMat Founder and CEO Tim McCarthy. “ZyBar thrives in harsh, high temperature header, exhaust, turbo environments, producing horsepower and torque and outstanding corrosion resistance without adding weight to the vehicle.”

With ZyCoat, HushMat is leveraging it's more than 30 years of experience designing, developing and manufacturing thermal management materials for the automotive industry. ZyCoat products – made in the United States – are natural extensions of the industry-proven, auto enthusiast-preferred products from HushMat. ZyBar is the revolutionary lightweight, heat dissipating, hard-wearing coating and is easy to apply with a spray gun right out of the can.

About ZyCoat and HushMat

HushMat, rated the #1 automotive sound deadening and thermal insulation material technology, is the highest performance material available to the automotive industry. HushMat® Ultra, a thermal insulating and sound deadening material, is easily applied to sheet metal, plastic or fiberglass surface surrounding vehicle interiors to reduce cabin noise and heat and improve the vehicle ride. HushMat is the only aftermarket sound deadening and thermal insulation material made in the United States.
