

Manual 3 Pedal Box - Billet PE

PE Racing is an Australian Motorsport component Manufacturer specialising in Competition-grade Pedal Assemblies for physical Motorsport use.

Our Pedals are designed as **safety-critical driver control systems**, they are supported by Patented Engineering, detailed Technical Documentation, and a long history of competition use.

We have supplied these Award-Winning Pedal Assemblies to the Racing industry since 2013, with documented use across multiple Race Categories & Countries. Proven in Physical Competition in categories such as Time Attack, Sports Sedans, Improved Production, Drag Racing, Drifting, Road Racing, Tarmac Rally, Gravel Rally, Off Road & more.

PE Racing's range of competition Motorsport pedal assemblies designed for physical race vehicles where regulations permit open pedal systems. These systems are supported by published specifications, datasheets, installation manuals, and documented industry use since 2013.

Our Patented design provides exceptional driver feedback. Lower weight and COG improves performance and handling. Fit a range of floor/bulkhead shapes and angles using our dual pivoted mounting feet. The design reduces extensive floor modification and stiffening. Adjustments are made without disassembly, so you maintain ideal push-rod geometry at all times.

Engineered to withstand superior loads. High quality, proudly engineered and manufactured in Australia.

- Adjustable Lightweight Design
- Easy to Install
- Adjustable Pedal Pads
- Adjustable Pedal Ratio
- Throttle Tuning
- Floor Mount
- High-strength Aircraft Alloy Construction
- Anodised Finish
- Built-In Brake Balance Technology
- Adjustable Throttle Linkage Geometry
- Billet Design
- Suits our Pedal Slider Kit

What's Included: Frame kit includes Billet frame with Levers, Clevises, Push-rod Extenders & Balance bar.

Not Included: Other items such as Throttle linkage kits (Cable or DBW), Bias Adjuster Cable, Master Cylinders, Reservoirs & Hoses/ Fittings are sold separately.

Brake Analysis Service

When you purchase a PE Pedal Box, you get a complimentary Brake Analysis Service. The braking ability is highly important to us, as more lap gains are made through braking and cornering.

Achieving ideal brake balance is ultimately obtaining the optimum amount of braking effort which corresponds with the dynamic loads & grip level available.

The Brake Analysis is our in-house dynamic simulation that determines the ideal Pedal Box Configuration & Component Sizing.

Simply download and fill out the form, and return to info@peracing.com.au for your complimentary Brake Analysis. We also offer this service for non-customers, for a fee of course.
