20055836	Lifestyle Chair Component Sub Assembly Box 2 of 2	\$525.00

RECARO SEATING TRAINING

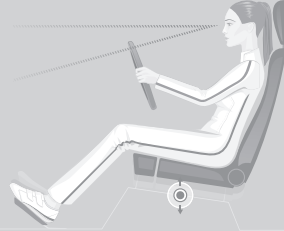

1. Push your bottom as near as possible to the backrest. Adjust the distance from the seat to the pedals so that your knee is slightly bent when the pedals are fully depressed.

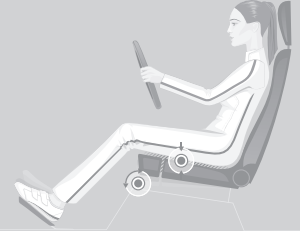

2. Rest your shoulders as near as possible to the backrest. Set the backrest tilt so that the steering wheel is easy to reach with slightly bent elbows and your shoulders stay in contact when turning the wheel.

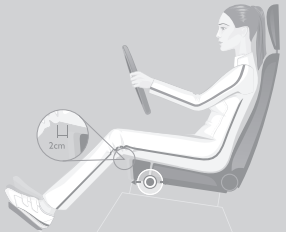

3. Set the seat height as high as possible for an unobstructed view of all sides and all the instrument panel displays.

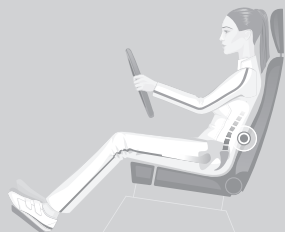

4. Set the seat cushion tilt so that it is easy to fully depress the pedals. Your thighs should rest gently on the seat cushion without exerting pressure on it. Check the backrest tilt before starting the engine.

5. Adjust the extendable seat cushion so that your thighs rest on it to just above the knee. The rule of thumb is two to three fingers' clearance between the seat edge and the hollow of the knee.

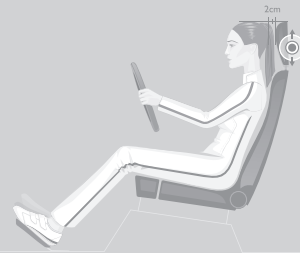

6. The lumbar support has been adjusted correctly when it supports the natural curve of your lumbar spine.

7. The seat's side bolsters should fit snugly enough to support your upper body at the side without restricting it.

8. If possible, adjust the upper edge of the headrest to the same height as the top of your head. Tilt: The distance to your head should be approx. 0.79 inch.

RECARO COVER MATERIALS:

RECARO LEATHER:

RECARO leather is a high-quality natural product designed for exacting requirements.

ARTISTA:

A timelessly elegant fabric for a refined interior. Guarantees longevity and durability.

NARDO:

In combination with the Artista upholstery, this ultra-durable material keeps your side bolsters in perfect shape for a very long time.

NAPPA LEATHER:

Nappa leather is a soft and smooth leather designed for the highest demands.

RECARO VINYL:

RECARO vinyl is a high-quality, highly durable easy-care alternative to leather (meets FMVSS 302 for flammability).

RHINO VINYL:

A weather and abrasion resistant upholstery material, specifically designed for demanding environments (meets FMVSS 302 for flammability).

ALCANTARA® SUEDE:

This exclusive suede effect upholstery is highly durable and easy-care with a premium feel.

CARBON WEAVE:

The Carbon Weave material is a distinct blend of black, gray and silver threads that offers a carbon fiber like appearance. The physical properties of this fabric are warranted to meet OEM Engineering Standards and enthusiasts vehicle theme demands.

NOTES:

- Customers may provide their own bespoke upholstery materials. These must be suitable and approved for use in the automotive sector. The seat cooling and heating functions may be restricted as a result. Current seat upholstery from selected automotive manufacturers is available on request (restrictions apply).
- Current seat covers from selected automobile manufacturers are available on request available (with restrictions).
- All trim cover materials meet FMVSS 302 for flammability.
