

## ▼ BIG BRAKE KITS

THE END-ALL BRAKE SOLUTION

- Available in three forged aluminum caliper models: Saturn, Triton, and Triton-R
- Billet aluminum radial mount caliper brackets
- High carbon, 2-piece iron rotor with patented Sparta DCF-96 vane design and TW-3 slot pattern
- SPP 1.0 street performance brake pads
- Custom Sparta stainless steel braided brake lines
- P518 street performance DOT4 brake fluid

**NOTE:** SATURN AND TRITON CALIPERS AVAILABLE IN FOUR COLORS (BLACK, BLUE, RED, YELLOW) AND TRITON AND TRITON-R AVAILABLE IN NICKEL ALLOY.

### ABOUT SPARTA EVOLUTION

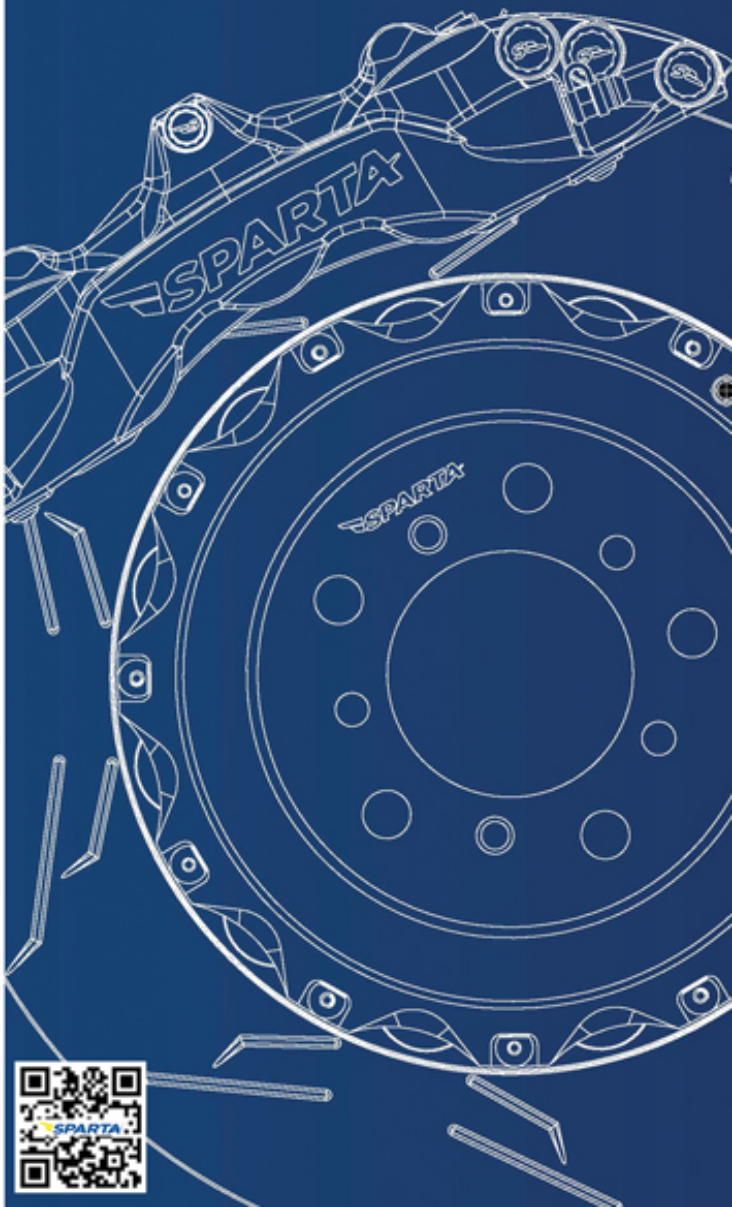

WE LOVE CARS. WE MAKE BRAKE PARTS.

Sparta Evolution is a brake manufacturer located in Kent, WA, USA. Our product range includes: big brake kits, performance brake pads, 1-piece and 2-piece rotors, stainless steel braided brake lines, and performance brake fluid. From daily drivers to custom built track cars, Sparta Evolution will provide the highest quality, best performing brake products in the industry. Become a part of the Evolution of Braking with Sparta.

**SPARTA™**  
HIGH PERFORMANCE BRAKE SYSTEMS

## ▶ PERFORMANCE BRAKE PADS

START HERE FOR BETTER BRAKING PERFORMANCE

Sparta's SPP 1.0 street performance brake pads feature a unique high carbon-based semi-metallic compound, formulated to maximize the performance of an OE braking system. Designed with high initial bite and linear pedal feel in all conditions, the SPP 1.0 pads offer a true feel of brake modulation while also increasing the working temperature range of the braking system. Fast acting and fade free, SPP 1.0 pads are chamfered, shimmed and slotted to reduce noise and deliver smooth, consistent performance.

## BRAKE FLUID ▶

THE OFTEN OVERLOOKED CRITICAL COMPONENT

Sparta's P518 and R622 are DOT4 certified premium brake fluids. They are perfectly suited to cover all types of driving, from your daily commute to a weekend at the track. Where R622 is designated as a high performance track fluid, P518 is ideal for car, truck, commercial vehicle and motorcycle hydraulic systems that demand high performance and long life.

## ▲ ROTORS

HIGH TECH, HIGH PERFORMANCE, HIGH CURB APPEAL

Sparta's GP1 rotors are direct OE replacements featuring the patented TW-3 tri-wing slot pattern. Designed for longevity and smooth actuation, the TW-3 pattern features the signature "W" shaped slots uniformly sized and evenly distributed across the rotor surface. GP-1 rotors are manufactured using high carbon cast iron to increase wear resistance and heat cycling capabilities. The GP-1 rotors are high performance OE replacements designed to outperform any other OE replacement rotor on the market.

## ▶ PAD AND ROTOR KITS

GET THE MOST OUT OF YOUR STOCK CALIPERS

Sparta's OE upgrade pad, rotor and fluid (1BK series) packages are designed to maximize the potential of your brake system without having to replace your standard calipers. Equipped with our SPP 1.0 street performance brake pads, GP-1 high carbon 1-piece slotted iron rotors and P518 street performance DOT4 brake fluid, our 1BK packages will vastly improve the pedal feel, modulation, and working temperature range of an OE brake system, while maintaining everyday drivability.
